Below is a comprehensive summary of all the development, support, and maintenance work completed for the project. This includes multiple modules that were delivered **beyond the agreed scope**, as well as additional revisions and complimentary work provided throughout the process.

📌 Development Work Completed

🔹 UI/UX Development (Without Any Provided Design)

- Complete UI/UX creation was done from scratch as no design files or Figma screens were provided.
- Ensured consistent branding, responsive layouts, and smooth user flows across the entire application.

🔹 Core App Modules Delivered

1. **User Onboarding**
2. **Match Module**
3. **Advice Module**
4. **Live Streaming Module**
5. **Feed Module**
6. **Multiple Profiles Support**
7. **Match & Chat Functionality**
8. **Profile Editing & Settings**
9. **Interactive Live Chat**
10. **Sending Gifts in Live Streaming**
11. **Saving & Viewing Live Replays**

12. **Full Notification System Integration**
13. **Search Screen**
14. **Shift of Payment Gateway**

- From originally decided option → to Flutterwave
- Then again shifted to Google Play / Apple In-App Payments (in-progress)

All core application features have been developed, tested, and delivered successfully.

📌 Additional Support Provided

- **Direct support and communication with Zego Cloud** to resolve integration-level issues.
- **Website development**, consisting of *8+ individual pages/screens*, provided **as complimentary work**, even though it was not included in the original project scope.
- Added **Live Schedules** feature (not included in the initial scope), integrated smoothly with the Live Streaming module.
- Assisted with multiple rounds of revisions during development to ensure smooth functioning.

📌 Maintenance Work

- Numerous UI changes
- Transitioned from **Flutterwave** to **Google Play Store & Apple App Store IAPs**, including necessary structural modifications. (IN PROGRESS - Only this change will not be paid)
- Updated **branding, app logo, color themes**, and styling changes as per new directions.
- Adjustments and optimizations for both Android & iOS platforms.

📌 Important Notice

All the above items represent the completed project scope along with many additions and revisions that were accommodated without extra charges.

Any new changes or feature requests beyond what is listed above will now be considered as *paid revisions*, as the original project requirements have been fully delivered.

We have supported several extra changes to ensure the product meets your expectations, and moving forward, any new development will fall under additional scope.
